SUBJECT INDEX

Editorials are indicated by (*E*); abstracts by (Abst.) after the page number; book reviews by (B. Rev.) after the page number.

A

Abortus-melitensis group, fermentation of monosaccharids by organisms of, 641
Abstracts, 87, 189, 296, 505, 605, 696, 785, 1032, 1171, 1295
Acetoacetic acid in urine, simple determination of, 607 (Abst.)
Acetone in blood and urine, 89 (Abst.)
method for detection of, 89 (Abst.)
Achlorhydria in pernicious anemia, significance of, 1052 (*E*)
Achylia gastrica, 89 (Abst.)
Acid, acetoacetic, in urine, simple determination of, 607 (Abst.)
-fast nonpathogens, growth of, on different mediums with their reaction to chemical reagents, 348
lactic, in blood, studies on, 723
oxalic, as reagent for isolating tubercle bacilli, 348
tungstomolybdic, as precipitant for blood proteins, 607 (Abst.)
Acidophilus culture, determination of effectiveness of, in functional disturbances of colon, 548
effectiveness of, in functional disturbances of colon, determination of, 548
milk, preparation of, 92 (Abst.)
Acids, amino, biochemistry of, 707 (B. Rev.)
Acromegaly, carbohydrate metabolism in, 216
Adhesions caused by extraperitoneal injection of neoarsphenamine, experimental elimination of, 17
Agar slants, ammonia production in, detection of, 1043 (Abst.)
Agglutination of brucella abortus, some observations on, 444
reaction, effect of bile on, 493
test, stained slide microscopic, 508 (Abst.)
Air filter, mechanical, in treatment of hay fever and pollen asthma, new and simplified, 643
Albumin, new test for, 609 (Abst.)
in cerebrospinal fluid, new method for estimation of, 1038 (Abst.)
Alexin and antialexic bodies in relation to blood culture technic, 662
Alimentary tract of man, studies in, 43, 132, 142
Allergic joint, the, 1109
reactions, effect of, on course of nonallergic diseases, 726
Allergy, new method of administering pollen extract for purpose of preventing reactions, 1171 (Abst.)
Ameba: study of stools cultured for E. histolytica, 789 (Abst.)

Eosinophilia in liver diet, 790 (Abst.)
Erythroblasts and myelocytes in traumatic knee joint effusions, 696 (Abst.)
Erythrocytes in thyrotoxicosis, sedimentation velocity of, 590
of man, technic of determination of relative mass, individual cell volume, and volume index of, 736
suspension stability of, and precipitation of serum protein with aluminum sulphate, plasma protein in relation to, 209
Exudates and transudates, classification test for, 507 (Abst.)

F

Fat metabolism, studies on, 221
tolerance in obesity, 221
Feces, isolation of bacillus typhosus from, new method of, 1036 (Abst.)
Female sex hormone, 510 (B. Rev.)
Fiamberti and Rizzatti spinal fluid tests, 1172 (Abst.)
Fibrillary neuroglia, staining, in formalin fixed material, 93 (Abst.)
Filter, glass light, for Folin's new micro blood sugar method, 766
Flagella, bacterial, method of staining, 90 (Abst.)
method for staining, 610 (Abst.)
Folin micro blood sugar method, reduction in amount of blood required for, 982
micromethod for determination of blood sugar, study of new, 151

Folin new micro blood sugar method, glass light filter for, 766
Francis' disease (tularemia), recent developments in, 311
Frog heart perfusion, modification of Simpson method of, 174
Frozen sections, Rhamy triple stain for, 490

G

Gall bladders, diseased, bacteriological study of group of, 608 (Abst.)
Gastric digestion, effect of colitis on, 623
responses, disturbances of central origin in, 142
reflex effect of heat and cold upon, 132
to milk and buttermilk, 43
Gastroenterologic table with special drainage outfit, 601
Genitourinary tract infections, bacteriology of, 95 (*E*)
Gingivitis, character of exudate in, 495
Gland cultures in infectious arthritis, 298 (Abst.)
Glucose injections, intravenous, chemical aspects of, 51
Goiter prevention and thyroid protection, 618 (B. Rev.)
Golgi method, modification of, 1295 (Abst.)
rapid, 1295 (Abst.)
Gonococcus and allied organisms, useful method for cultivation of, 179
fixation test, reliability of, 66
successful cultivation of, on blood agar, 90 (Abst.)
Gonorrhea, laboratory diagnosis of, oxidase reaction in, 90 (Abst.)
recent advances in treatment of, 785 (Abst.)
Gonorrheal arthritis, recent studies of rheumatism, with special reference to, 1062
Graduated test tube colorimeter, 1018
Gram-negative corynebacterium, determinative studies of undescribed species of, 973
reaction, cell wall and, 189 (Abst.)
Guanidine compounds, effect of, on unanesthetized dogs, 125
Guinea pigs, tuberculosis in, 205

Protein in spinal fluid, microchemical determination of, 606 (Abst.)

Protein—Cont'd
plasma, in relation to suspension stability of erythrocytes and precipitation of serum protein with aluminum sulphate, 209
Proteins, blood, tungstomolybdic acid as precipitant for, 607 (Abst.)
of cerebrospinal fluid, improved colorimetric procedures for quantitative estimation of, 370
Protozoology, medical, introduction to, 707 (B. Rev.)
Psychology and psychiatry, practical, 617 (B. Rev.)
Pulmonary secretions in infants and children, direct laryngoscopy as method for cultural studies of, 611 (Abst.)
Pus, calcium content of, method for determination of, 693

R

Rabies, milk-borne, 460
Rat sarcoma, effect of lead on, 24
Reaction, agglutination, effect of bile on, 493
biologic, in urine of the tuberculous, 698 (Abst.)
Gram, cell wall and, 189 (Abst.)
Kahn, heating of serum in, 678
Müller's conglobation, for diagnosis of syphilis, 682
Strzyzowski, modification of, 609 (Abst.)
van den Bergh, 292
Voges-Proskauer, 190 (Abst.)
Wassermann, as a routine test in hospital practice, 609 (Abst.)
Reactions, allergic, effect of, on course of nonallergic diseases, 726
Rectum, cultures of, simple method of making, 508 (Abst.)
Renal insufficiency, value of indicanemia in cases of, 1036
Respiration, artificial, new pump design for, with several variable features, 657
Respiratory exchange of dog, new type of mask for study of, 1022
Reticulocyte count in normal and abnormal conditions, 1042 (Abst.)
Reticulocytes, simple method of obtaining permanent prepartions, 696 (Abst.)
determination of, 1043 (Abst.)
response of, to liver therapy, 191 (Abst.)
their identification and significance, 474
Rhamy triple stain for frozen sections, 490
Rheumatic disease, chronic, vaccine treatment of, 1173 (B. Rev.)
fever, streptococcal etiology of, recent researches on, 1124
Rheumatism and arthritis, chronic, specific vaccine treatment of, 1072
British Red Cross Society's clinic for, 1161
challenge of, 1297 (*E*)
recent studies of, with special reference to gonorrheal arthritis, 1062
Rheumatoid and osteoarthritis, differential diagnosis of, 1065
Robert Jones birthday volume, 796 (B. Rev.)
Russia in 1897, 912

S

Sacs, collodion, a suggestion for, 265
Sarcoma, rat, effect of lead on, 24
Scarlet fever, erysipelas, and septic sore throat, streptococci from, 1036 (Abst.)
Scopometer, junior, 507 (Abst.)
Sedimentation reaction and its value in differential diagnosis of rheumatoid and osteoarthritis, 1065
time, blood, estimation of, 54
velocity of erythrocytes in thyrotoxicosis, 590
Sensitivity of the Kolmer and Kahn tests during chill and fever, 25
Sera, heating of, in Kahn test, 62
Serum agar, hydrolyzed, for the isolation of C. diphtheriae, 505 (Abst.)
blood, experimental studies in deproteinizing, 720
glycerinated human, Wassermann test with, 272
heating of, in Kahn reaction, 678
protein concentration in case of multiple myeloma of plasma cell type, note on, 554
test for diagnosis of cancer based on new theory of etiology, 605 (Abst.)
therapy of meningococcic meningitis, 709 (*E*)
Shiga dysentery, diagnosis of, application of Twort-D'Herelle phenomenon in, 83
Sickle cell anemia, 519
in a Greek family, 611 (Abst.)
Silver-starch-gelatine method for tissues, 1039 (Abst.)
Simpson method of frog heart perfusion, modification of, 174
Single-cell technic, Orskov, modification of, 186
Skin and its tumors, silver staining of, 195 (Abst.)
discoloration of, due to mercury, 296 (Abst.)
Slide rule for calculating date on which given interval in days will fall, easily constructed, 72
Snake bite, poisoning from, in the United States, 797 (*E*)
Sodium bicarbonate, preparation of, for intraperitoneal use, 696 (Abst.)
carbonate solution, M/6, apparatus for slow intra-arterial injection of, as anticoagulant in blood pressure experiments by means of compressed air, 1028
chloride media for separation of certain gram-positive cocci from gram-negative bacilli, 192
Spectrophotometric determination of hematoporphyrin in urine, 162
Spermatozoa count in diagnosis, prognosis, and treatment of sterility, 296 (Abst.)
Spinal fluid, bicolored Guaiac test for, 1044 (Abst.)
protein of, microchemical determination of, 606 (Abst.)

Spinal fluid—Cont'd
the Fiamberti and Rizzatti test, 1172 (Abst.)
Spirocheta pallida, staining of, 1033 (Abst.)
Spirochete stains, some new, 93 (Abst.)
Spirochetes, staining of, in nervous tissue, 297 (Abst.)
Sputa of different types of phthisis, tubercle bacilli, and elastic tissue fibers in, 1
Sputum cultures, bacteria in, from fifty patients having asthmatic bronchitis, 6
examination of, for tubercle bacilli, application of Corper-Uyei method in routine, 572
pneumococcus in, rapid method for determining type of, 78
slides, hot plates for staining, 57
studies in children, 611 (Abst.)
Stain, combined nuclear and differential, 507, 701 (Absts.)
for B. leprae and myelin sheath, 702 (Abst.)
for frozen sections, Rhamy, 490
for negri bodies, 608 (Abst.)
hematein, 697 (Abst.)
Mayer's hemalum, modification of, 505 (Abst.)
Rhamy, for frozen sections, 590
Stoltenberg, for B. diphtheriae, 1039 (Abst.)
Wright's, method of using, in staining jars, 81
Stained slide microscopic agglutination test, 508 (Abst.)
Staining bacterial flagella, method of, 90 (Abst.)
brown and melanotic pigment, method of, 197 (Abst.)
fibrillary neuroglia in formalin fixed material, 93 (Abst.)
negative, for bacteria, 790 (Abst.)
of polar bodies, method for, 170
of Spirocheta pallida, 1033 (Abst.)
of spirochetes in nervous tissue, 297 (Abst.)
of tubercle bacilli, 702 (Abst.)
bacillus, rapid, 610 (Abst.)
of tumors of spongioblastic origin, 192 (Abst.)
oligodendroglia and microglia, method of, 91 (Abst.)
flagella, method for, 610 (Abst.)
silver, of skin and its tumors, 195 (Abst.)
sputum slides, hot plates for, 57
Stains, biological, 613 (B. Rev.)
spirochete, some new, 93 (Abst.)
Sterility, spermatozoa count in diagnosis, prognosis, and treatment of, 296 (Abst.)
Sterilization for human betterment, 794 (B. Rev.)
Stimulus selector, improved, 603
Stoltenberg stain in B. diphtheriae, 1039 (Abst.)
Stomach, diseases of, 94 (B. Rev.)
excretion of neutral red in, 89 (Abst.)
Stools cultured for E. histolytica, study of, 789 (Abst.)
Streptococcal etiology of rheumatic fever, recent researches on, 1124
Streptococci, arthritic, microphotographic study of five varieties of, 1117
from scarlet fever, erysipelas, and septic sore throat, 1036 (Abst.)
pathogenicity and sugar fermenting properties of, 539
study on, in relation to pathogenicity and sugar fermenting properties, 539
Streptococcus cardioarthritidis, biologic products of, and latest developments in technic of their therapeutic applications, 1093
Strontium, toxicity of, and comparison with other cations employed in therapeutics, 35
Strzyzowski reaction, modification of, 609 (Abst.)
Sugar content of blood, 1049 (*E*)
and urine, concerning certain factors which may influence, 234
Surgery, minor, some principles of, 793 (B. Rev.)
Sympathetic ganglionectomy and trunk resection, treatment of chronic infectious arthritis by, 1247
Synovial fluid in health and disease, 1187
Syphilis, rapid precipitation test for, 697 (Abst.)
comparison of Kolmer, Wassermann, and Kahn tests and dark-field examination in primary, 579
controlled flocculation test for, 787 (Abst.)
delayed dark-field examination, 1033 (Abst.)
diagnosis of, Müller's conglobation reaction for, 682
microscopic slide precipitation test for, clinical and serologic comparison of, and Wassermann test with same antigen, 1008
with unheated serum, 686
one thousand precipitation tests for, with small quantities of defibrinated finger blood, 768
precipitation, precipitation-fixation and cold fixation tests for, serologic studies by, 985

T

Technician, a columnist's conception of, 107
Test, bicolored Guaiac, for spinal fluid, 1044 (Abst.)
Biuret, convenient modification of, 185
classification, for exudates and transudates, 507 (Abst.)
controlled flocculation, for syphilis, 787 (Abst.)
Eijkman fermentation, as aid in detection of fecal organisms in water, 194 (Abst.)
Fiamberti and Rizzatti spinal fluid, 1172 (Abst.)
for albumin, new, 609 (Abst.)
for indol, simple, 297 (Abst.)

Test—Cont'd
for syphilis, controlled flocculation, 787 (Abst.)
gonococcus fixation, reliability of, 66
intracutaneous virulence, new suspending medium for, 506 (Abst.)
Kahn and Kolmer, sensitivity of, during chill and fever, 25
heating of sera in, 62
microscopic slide precipitation, clinical and serologic comparison of, for syphilis and Wassermann test with same antigen, 1008
for syphilis with unheated serum, 686
quantitative tuberculin, 566
serum, for diagnosis of cancer based on new theory of etiology, 605 (Abst.)
stained slide microscopic agglutination, 508 (Abst.)
tubes, washing, time-saving device for, 584
virulence, intracutaneous, new suspending medium for, 506 (Abst.)
Wassermann, with glycerinated human serum, 272
Testicle, embryonal carcinoma of, 323
Testis, malignant neoplasms of, 464
Tests for syphilis, precipitation, precipitation-fixation and cold fixation, serologic studies by, 985
Hinton, Kahn, and Wassermann, comparative study of 2,000, 994
Kolmer, Wassermann, and Kahn, comparison of, and dark-field examination in primary syphilis, 579
precipitation for syphilis, one thousand, with small quantities of defibrinated finger blood, 768
precipitation-fixation, and cold fixation, for syphilis, serologic studies by, 985
Therapeutics, cations employed in, toxicity of strontium and comparison with, 35
Thionin counterstain for Levaditi tissue, 660
Thyrotoxicosis, erythrocytes in, sedimentation velocity of, 590
Tissue, connective, new differential stain for, with hematoxylin and eosin, 1172 (Abst.)
crusher, new type of, 285
Levaditi, thionin counterstain for, 660
nervous, staining of spirochetes in, 297 (Abst.)
sections, paraffin method for, new rapid, 290
stain, muci-carmine, preparation of, 610 (Abst.)
Tissues, plant, short method of clearing, 605 (Abst.)
rapid paraffin method, 702 (Abst.)
silver-starch-gelatine method for, 1039 (Abst.)
Toxicity of strontium and comparison with other cations employed in therapeutics, 35
Toxicology, memoranda of, 614 (B. Rev.)
Toxins, antitoxins, and dermagens, 30
Traumatic arthritis and mechanical factors in hypertrophic arthritis, 1145
Tubercle bacilli and elastic tissue fibers in sputa of different types of phthisis, 1
examination of sputum for, application of Corper-Uyei culture method in routine, 572
method for rapid demonstration of, 1171 (Abst.)
oxalic acid as reagent for isolating, 348
primary culture of, 191 (Abst.)
staining of, 702 (Abst.)
bacillus, comparison of Petroff's and Petragnani's methods for primary culture, 697 (Abst.)
medium for, 197 (Abst.)
rapid staining of, 610 (Abst.)
Tuberculin test, quantitative, 566
Tuberculosis, 792 (B. Rev.)
cholesterol agglutination reaction for, 1042 (Abst.)
in guinea pigs, 205
vaccination against, by means of B. C. G., 302 (B. Rev.)
Tuberculous, urine of the, biologic reaction in, 698 (Abst.)
Tularemia, 615 (B. Rev.)
(Francis' disease), recent developments in, 311
Tumors, issues at stake in grading of, 1172 (Abst.)
malignant, rapid diagnosis of, 1035 (Abst.)
of spongioblastic origin, staining of, 192 (Abst.)
studies on organism isolated from, 109
Tungstomolybdic acid as precipitant for blood proteins, 607 (Abst.)
Twort-D'Herelle phenomenon, application of, in diagnosis of Shiga dysentery, 83
Typhoid and paratyphoid bacilli in water, new enrichment method for, 607 (Abst.)

U

Undulant fever, isolation of brucella organism from the stools, 297 (Abst.)
laboratory diagnosis of, 437
Urea in blood, B. Gruskin's determination of, micromodification of, 260
Uremia, Diazo color-reaction in, 1043 (Abst.)
Uric acid increase in blood of patients with cardiac decompensation, 13
Urinalysis, quantitative microscopic, 386
Urinary P_H, colorimetric estimation of, 752
Urine, acetoacetic acid in, simple determination of, 607 (Abst.)
determination of urobilin in, 697 (Abst.)
hematoporphyrin in, spectrophotometric determination of, 162
lipoids in, incidence of, 953
of the tuberculous, biologic reaction in, 698 (Abst.)
tests, blood pressure, blood urea nitrogen, phenolsulphonephthalein, comparison of, in the aged, 633
Urobilin, determination of, in urine, 697 (Abst.)

V

Vaccination against tuberculosis by means of B. C. G., 302 (B. Rev.)
Vaccine treatment of chronic arthritis and rheumatism, 1072
rheumatic disease, 1173 (B. Rev.)
Vaccines, bacterial, new method of producing, 607 (Abst.)
Van den Bergh reaction, 292
Varney jar, modified, for cultivation of anerobes by means of phosphorus, 268
Vaughan, Victor V. (1851-1929), an appreciation, 304, 898
bibliography, 934
biochemist, 843
biographic sketch of, 817
chemist, 839
colleague, 885
councillor, 888
crusader, 849
educator, 833
epidemiologist, 865
executive, 829
friend, 891
hygienist, 876
immunologist, 861

memorial to, 817
memories, 902
missionary, 896
pioneer passes, 823
Vaughan, Victor V.—Cont'd
remarks on behalf of the Board of Regents, 831
resolutions, 928
sanitarian, 874
society, 900
soldier, 878
standard bearer, 827
toxicologist, 845
Venous pressure, clinical aspects of, 793 (B. Rev.)
Virulence test, intracutaneous, new suspending medium for, 506 (Abst.)
Voges-Proskauer reaction, 190 (Abst.)
Volume index determinations, new centrifuge tube for, 172

W

Washing test tubes, time-saving device for, 584
Wassermann reaction as routine test in hospital practice, 609 (Abst.)
test, clinical and serologic comparison of microscopic slide precipitation test for syphilis and, with same antigen, 1008
with glycerinated human serum, 272
White blood cell counts, simplified method for, that is applicable to field conditions, 756
Wright's stain, method of using, in staining jars, 81
